

Steve Lampert
Project Manager Clean Water Services
2550 Hillsboro Highway
Hillsboro, Oregon 97123

August 31, 2005

Dear Mr. Lampert,

First of all I would like to thank you for the excellent job your people did with Sanitary Sewer Rehabilitation Project # 6219 (1S306BC00600) In Forest Grove.

As a property owner living in this area, you could not have asked for a better construction company. Landis and Landis employees were just super in dealing with all the people in our neighborhood. If someone needed to get out of their garage and the crews were doing work in the alley, they said "No Problem" they would move their equipment and cover the hole with a steel plate so we could drive out and then they could get back to work. They truly know about customer service in dealing with all our neighbors and their special concerns in our area.

The finishing touch come from the S-2 Paving Company. Just like Landis & Landis, their employees excellent as well. Dealing with all the neighbors and did a super job of blacktopping the construction holes in our alley. **It's just perfect.**

Your Inspector Mike Ohler was always on scene checking on everything to keep things going. Mike is a super guy and knows how to get along with everyone. He helped make this project real enjoyable for all of us property owners. We are kind of sad, that they have moved on to other streets in our area but we still consider all of them as our friends.

It's been a real pleasure to deal with your people and the excellent construction companies you chose for the project in our area.

Thanks So Much,....They are Excellent!!

Yours truly,

Neil Heesacker
